Professional Summary

B.Tech Computer Science graduate specializing in full-stack MERN development with hands-on experience building and deploying production-grade web applications. Proficient in React.js, Next.js, Node.js, Express.js, and MongoDB. Familiar with software testing practices including manual testing, API testing (Postman), and automation (Selenium, Cypress). Seeking a Software Engineer or SDET role to apply development and testing skills in a collaborative environment.

Technical Skills

- **Languages:** JavaScript, C++, Java, Python, SQL
- **Frontend:** React.js, Next.js, React Native, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database:** MongoDB, Mongoose
- **Testing:** Manual Testing, API Testing (Postman), Automation Testing (Selenium, Cypress), Test Case Design, Bug Reporting
- **Libraries & Tools:** Redux, NumPy, Pandas, GitHub, VS Code, Jupyter Notebook
- **Concepts:** DSA, SEO Optimization, Socket.IO, MVC Architecture

Work Experience

Web Development Intern — Netcamp Solutions Pvt. Ltd.

- Developed and maintained web application features using the MERN stack
- Collaborated with senior developers to design and implement REST APIs
- Participated in code reviews and contributed to improving application performance
- Assisted in manual testing and bug reporting across multiple project modules

Education

Raj Kumar Goel Institute of Technology (AKTU), Ghaziabad

Bachelor of Technology in Computer Science and Engineering

Asha Modern School, Saharanpur — Class XII (CBSE)

Asha Modern School, Saharanpur — Class X (CBSE)

Projects

ShopKaro (E-commerce Platform) Live · GitHub

- Built a full-stack e-commerce platform supporting 100+ products with secure JWT authentication and role-based access control
- Integrated Razorpay payment gateway enabling seamless online transactions with order tracking
- Developed a complete admin dashboard for real-time management of products, orders, and users
- Designed 15+ REST API endpoints with input validation and error handling

EasyDine (Food Ordering & Seat Booking) Live · GitHub

- Developed a full-stack food ordering and restaurant seat booking platform with real-time availability
- Implemented online table reservation system integrated with a payment gateway

- Built role-based dashboards for customers and admin with separate access controls
- Optimized backend API response times by restructuring MongoDB queries and indexing

HealthApp (Healthcare Platform) Live · GitHub

- Developed a full-stack healthcare platform with patient management, admin panel, and appointment booking
- Implemented on-page SEO optimization improving search visibility and page load performance
- Built scalable REST APIs handling healthcare data with proper validation and authentication
- Designed a fully responsive UI supporting both mobile and desktop users

BookPlaza (Online Bookstore Platform) Live · GitHub

- Built a full-stack online bookstore using **Next.js** and Node.js supporting both physical and digital (eBook) purchases
- Implemented server-side rendering (SSR) for improved SEO and faster page load performance
- Integrated Razorpay payment gateway and developed a PDF invoice generation system using PDFKit
- Built real-time order tracking with Socket.IO and an admin dashboard for managing books, orders, and users

Certifications & Achievements

- | | |
|--|------|
| • Python Programming — Meta via Coursera | 2023 |
| • IoT Workshop — IIT Varanasi | 2022 |
| • 2nd Position — Techzibition Delhi Zonals (Inter-college Technical Competition) | 2022 |
| • Participated in 3+ national-level hackathons | |
| • IoT Training — NASSCOM | |

Volunteer Experience

- **Web Master** — Pushpak Flying Club: Managed and maintained the club's official website
- **Core Member & Web Developer** — IEEE SB RKGIT: Built event pages and managed web presence for the student branch
- **Core Member** — IOTuino Club: Contributed to IoT workshops and hands-on training sessions
